

ISONAS delivers the one proven access control solution that offers network-based, Pure IP™ to-the door technology. Unlike traditional panel-based or IP-panel systems, we eliminate the need for cumbersome control panels at each and every access point, complex wiring and power supplies that are costly and regular maintenance across physical locations.

With our innovative Pure IP™ Reader-Controllers, ISONAS provides a simpler and smarter alternative. Our innovative technology enables you to manage multiple locations in real-time through your existing network, lower your total cost of ownership, and experience the flexibility to go places your organization never imagined.

ISONAS PURE IP SOLUTION TOPOLOGY

EASILY INTEGRATE ACROSS EXISTING SYSTEMS.

ISONAS provides an access control system that enables effortless integration with your existing systems—or new ones over time. Our open platform frees customers from proprietary, closed systems with limited features and functionality. Join the Pure IP™ revolution and let ISONAS's open platform allow you to create an IP ecosystem for the future.

VIDEO MANAGEMENT SYSTEMS

Our approach to integration is revolutionary for the industry. Our integrated video solutions provide users with a single, powerful interface for controlling doors and managing alarms and events all with a single command and control.

BRINGING GREATER INTELLIGENCE TO EVERY ASPECT OF ACCESS CONTROL.

Pure IP™ Reader-Controller

Whether used as a standalone product or with the Pure Access software, the new ISONAS Pure IP™ RC-04 hardware platform, with Bluetooth Low Energy (BLE) capability, delivers an entirely revamped aesthetic and forward functionality that increases flexibility for the customer in how and where their access control is installed. The ISONAS reader-controller will continue to be an all in one intelligent device and lead the industry in reader and controller technology. The RC-04 leverages our current patented technology and requires a single CAT5 cable to provide power and data; eliminating the need for a panel and providing a simpler and smarter alternative.

Pure Access

ISONAS Pure Access is a family of leading access control software products comprised of our fully hosted platform, Pure Access Cloud and an on-premise option, Pure Access Manager. Pure Access provides a complete access control platform allowing for full installation, administration and management of our patented Pure IP™ access control hardware. The modern user interface establishes a new standard for ease of use in managing an unlimited number of access points across any geography through a mobile device, tablet or modern browser. Pure Access brings new features and functionality to access control that fully leverage the power of our Pure IP™ hardware solution.

PowerNet™ IP-Bridge

Avoid rip and replace. Easily and cost effectively expand legacy systems to seamlessly operate within an ISONAS Pure IP™ environment. The same way the encoder helped analog video cameras move to IP, our IP-Bridge allows you to transition your customers from the Wiegand panel system to a Pure IP-based solution. Traditional and IP enabled panels can be replaced by simply unplugging existing panels and attaching Wiegand readers directly to the IP-Bridge. Two and three door configurations allow you to match the exact number of doors you are taking over. The PowerNet™ IP-Bridge enables legacy systems and newly installed PowerNet™ reader-controllers to operate as one system using a single credential.

PROVEN INNOVATION

Our patented Pure IP™ Reader-Controller provides the first "pure IP" to the door solution that eliminates the need for a separate power supply, control panel and dedicated hard wiring.

GREATER VALUE

Compared to traditional systems that require more equipment, labor and maintenance, the total cost of ownership is far less.

TOTAL FLEXIBILITY

The ability to easily integrate with other systems and go where other access control solutions can't gives you the freedom to adapt to changing needs.
