

# Coronavirus Communication

- **ASSA ABLOY Americas Opening Solutions is in daily communication with our supply and transportation partners to assess capacity and prioritize shipments.**
- **Most of the ASSA ABLOY Americas Opening Solutions factories are well stocked given consignment inventory and an increase in shipments prior to Chinese New Year. Currently, we do not see any significant supply issues.**
- **Most of our China based suppliers are long term partners who are well stocked to support ASSA ABLOY Americas Opening Solutions, and have committed to providing us with priority support.**
- **Our supplier base is well diversified for our commercial customer base. China represents less than 10% of our direct material procurement spend.**
- **None of our main suppliers or their sub-suppliers are located in the provinces most impacted by the virus.**
- **We are closely monitoring any impact to transportation and developing contingency plans which will include alternative routings and/or airfreight.**
- **We will continue to provide regular updates as necessary.**
