

LMS CUSTOMIZATION

Benefits of customizing an LMS with PSA

CUSTOMIZATION BY COMPANY

PSA University offers PSA owner/member companies the ability to customize their Learning Management System to assist with all training, learning and development needs including the ability to brand your nested LMS and create unique URLs!

ADMINISTRATOR OVERSIGHT

Customizing a nested LMS with PSA comes with Administrator access! The Administrator has the ability to add/delete users in their LMS. They also have all permissions associated with the platform, can create learning paths and courses, access dashboard analytics and have the ability to own the look and feel of their LMS.

COURSE CREATION

Customizing your own LMS within PSA University allows you to create courses specific to the needs of your organization and employees. Creating eLearning courses is usually a separate platform, but with PSA University you get access to a course creation tool built into the same platform.

DATA ANALYTICS AND TRACKING

Track ongoing courses, completion rate, results, achievements, collaboration dashboards, user oversight, popular courses and much more. The nested LMS comes with the ability to customize analytic dashboards and export training data.

For more information on customizing your own LMS, please fill out the following survey, and our team will reach out to you with next steps!
